

RANGER COLLEGE
Ranger, TEXAS

COURSE SYLLABUS

Human Anatomy and Physiology II

Biology 2402

4 credit hours

INSTRUCTOR:

Dr. Jerry Glidewell

INSTRUCTOR: Dr. Jerry Glidewell
EMAIL: jglidewell@rangercollege.edu
OFFICE: Science Building #3 Ranger Campus
PHONE: 254-267-7030
HOURS:

MONDAY: 3:40 - 5:00 PM

WEDNESDAY: 3:40 - 5:00 PM

OTHER TIMES BY ARRANGEMENT

The above schedule and procedures in this course are subject to change in the event of extenuating circumstances.

I. Texas Core Curriculum Statement of Purpose

Through the Texas Core Curriculum, students will gain a foundation of knowledge of human cultures and the physical and natural world, develop principles of personal and social responsibility for living in a diverse world, and advance intellectual and practical skills that are essential for all learning.

II. Course Description

2402 Anatomy and Physiology II (3-3) 2607075103

Study of the structure and function of human anatomy, including the neuroendocrine, integumentary, musculoskeletal, digestive, urinary, reproductive, respiratory, and circulatory systems. Content may be either integrated or specialized. Credit 4 semester hours.

III. Required Background or Prerequisite

Recommended prerequisite: BIOL 2401, or approval of instructor.

IV. Required Textbook and Course Materials

“Hole’s Human Anatomy and Physiology” 15 th edition by Shier, Butler, Lewis. 2019
McGraw Hill. ISBN 13: 978-1-259-86456-1

“Laboratory Atlas of Anatomy and Physiology” 6 th edition by Eder. 2009
McGraw Hill. ISBN 10: 0073525677, 13: 978-0073525679

V. Course Purpose

Courses in the life and physical sciences focus on describing, explaining and predicting natural phenomena using the scientific method. These courses involve the understanding of interactions among natural phenomena and the implications of scientific principles on the physical world and on human experiences.

VI. Learning Outcomes

Upon successful completion of this course, students will:

Use anatomical terminology to identify and describe locations of major organs of each system covered.

Explain interrelationships among molecular, cellular, tissue, and organ functions in each system.

Describe the interdependency and interactions of the systems.

Explain contributions of organs and systems to the maintenance of homeostasis.

Identify causes and effects of homeostatic imbalances.

Describe modern technology and tools used to study anatomy and physiology.

VII. Core Objectives

This course meets the following of the six Core Objectives established by Texas:

- Critical Thinking Skills (CT)** – Creative thinking, innovation, inquiry, and analysis; evaluation and synthesis of information
- Communication Skills (COM)** – effective development, interpretation and expression of ideas through written, oral, and visual communication
- Empirical and Quantitative Skills (EQS)** – The manipulation and analysis of numerical data or observable facts resulting in informed conclusions
- Teamwork (TW)** – The ability to consider different points of view and to work effectively with others to support a shared purpose or goal
- Social Responsibility (SR)** – Intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities
- Personal Responsibility (PR)** – The ability to connect choices, actions, and consequences to ethical decision-making

VIII. Methods of Instruction

1. Lectures (twice weekly) in which the major concepts and theories in anatomy and physiology will be discussed.
2. Labs (twice weekly) in which major anatomical and physiological principles will be demonstrated by examination of specimens and viewing videos.

IX. Methods of Assessment

Exams will consist primarily of fill-in-the-blank and short answer questions and will cover all material discussed since the last exam (except the final which is cumulative). Each question will be graded as correct or incorrect in accordance with information in the text and lectures. Exam grades will be taken as the number of points correct.

Students missing lectures are responsible for getting notes (notes, and other resources, are available on the Ranger College web page via Blackboard).

Make-up exams, for exams missed due to an excused absence, will be given later in the semester. Bonus points may be available for students taking the exam at the assigned time, but not for makeup exams. Students are strongly urged to not miss exams.

The course grade will be computed as follows:

$$\begin{array}{rcl} \text{Average of lecture exams (CT, COM, EQS)} & = & 3/4 \\ \text{Lab average (COM, TW)} & = & 1/4 \\ \text{Total} & = & \text{Course Grade} \end{array}$$

$$\frac{(\text{average of lecture exams} * 3) + \text{lab average}}{4} = \text{Course Grade}$$

Letter grades will be assigned as follows:

$$90-100 = A, \quad 80-89 = B, \quad 70-79 = C, \quad 60-69 = D, \quad \text{below } 60 = F$$

X. Course/Classroom Policies

Regular and punctual attendance in all classes and labs is considered essential for optimum academic success. If the student has the equivalence of three weeks of unofficial absences... the instructor may drop the student from the course with a grade of F (Ranger College General Catalog). Students are expected to be seated by the beginning of the lecture period. Excessive tardies (6) may be considered as absences. Excessive unexcused absences (6) may result in a grade of I (incomplete) and may result in dismissal from the course with a grade of F.

It is your responsibility to inform the instructor of an excused absence. An absence is excused if you are excused by the Dean to participate in an authorized College activity. Any student who is disruptive to the class will be dismissed from the class and may be dismissed from the course.

Any student found with unauthorized notes (cheat sheets, electronic devices, etc.) during an exam or copying from another student's exam will be subject to disciplinary action. Any student misconduct will be reported to the Dean of Student Services.

No tobacco use is permitted in the science building, or other locations on RC campus.

XI. Course Outline/Schedule
Biology 2402 Anatomy and Physiology

Text: Hole's Human Anatomy and Physiology 15th ed. by Shier, Butler and Lewis

<u>Date</u>	<u>Lecture Topic</u>	<u>Text Assignment</u>
1	Introduction, orientation and review	Chs 1, 3, 4
2	Endocrine system – gland structure and position	Ch 11
3	“ - hormones and their action	“
4	“ “	“
5	Cardiovascular system – Blood cell development/function	Ch 12
6	<u>Exam 1</u> (endocrine system)	
7	“ - white blood cells and defense	“
8	“ “	“
9	Cardiovascular system - heart structure	Ch 13
10	<u>Exam 2</u> (blood)	
11	Cardiovascular system - heart dynamics/control of flow	“
12	“ – vessel structure	“
13	“ - dynamics and blood flow	“
14	Lymphatic system – lymphatic tissue and lymph flow	Ch 14
15	<u>Exam 3</u> (cardiovascular system)	
Spring Break - enjoy		
16	Respiratory system – structure of conducting portion	Ch 16
17	“ - mechanics of pulmonary ventilation	“
18	“ “	“
19	<u>Exam 4</u> (lymphatic and respiratory systems)	
20	Digestive system – structure of digestive tube	Ch 15
21	“ “	“
22	“ - hormonal control of digestion	“
23	“ “	“
24	<u>Exam 5</u> (digestive system)	
25	Urinary system – structure and formation of urine	Ch 17
26	“ “	“
27	Reproductive system – male structures	Ch 19
28	“ - female structures	“
29	<u>Exam 6</u> (urinary and reproductive systems)	
30	<u>Final Exam</u> (includes material from exams 1 - 6)	

XII. Non-Discrimination Statement

Admissions, employment, and program policies of Ranger College are nondiscriminatory in regard to race, creed, color, sex, age, disability, and national origin.

XIII. ADA Statement

Ranger College provides a variety of services for students with learning and/or physical disabilities. Students are responsible for making initial contact with the Ranger College Counselor, Gabe Lewis (glewis@rangercollege.edu). It is advisable to make this contact before or immediately after the semester begins.
